enum KeySkills: String	let Profile: [String]
case App Development case Cloud Architecture case Team Leadership case Project Management case Effective Presentation	I'm a 27-year-old full stack developer from Edinburgh, Scotland and, whilst currently living in Hungary, will be moving back home and so am looking for work opportunities within the UK. I work primarily in web but love to delve into native projects. I've built software since I was 12 years old and still haven't found anything I enjoy nearly as much. I write software in Typescript, JavaScript, Swift and PHP primarily and dabble with a good number more. I build native applications for iOS, Android and MacOS, and web.
